

TEAM 1 QUARANTINE EXPECTATIONS

Step 1: Access your Canvas course daily for each class

Step 2: In each course, find the current unit/module that your class is working on (it should be at the very top)

Step 3: Find the current week and tap on that page

Step 4: On this page you will find each day of the week with the following listed under each day:

- a. **Activities:** this is the work that was done in class time. This is work that **SHOULD be completed**. Follow the directions carefully and do the best you can to complete each task. If you have a question on any of the tasks listed, please email your teacher for that class. Teachers are VERY flexible with “how” assignments are completed (Ex. You can write things on paper instead of uploading to Notability if that is easier for you).
- b. **Homework:** this is the homework that was assigned for that day. Again, do your best to carefully read the directions and complete the assignment. Assignments may be right in Canvas, on paper, in another app, or from a textbook. If you have a question on any of the tasks listed, please email your teacher for that class.

Need some technology help? If you have questions on how to submit assignments, how to access documents, etc., start by looking at the “iPad/Technology Resources” module listed in all your core class courses. The module provides demonstration videos to help with these tasks.
