Assignment:

using the PDF on the Flynn website under the MAPE tab, build a **spool knitter**. Follow the directions to create something amazing!

Crochet (krow-shay)

is a fiber art wherein a hook is used to create interlocking loops in yarn to form patterns.

After creating a length of spool knitting, what will you make with it—a functional piece of art like a bracelet? Or an abstract sculpture?

If you don't have yarn, string, or thread, try cutting a plastic bag into strips as a substitute! OR CREATE A SCULPTURE USING ITEMS FOUND IN YOUR RECYCLE BIN. Upload a photo to your Artsonia gallery under **"Element of Art: Form."**

Element of art: **Form**

takes up space (3D) and is real or implied.

Haegue Yang was born in 1971 and is a South Korean fiber artist best known for her **knitted** sculptures. The sculpture (upper right) incorporates items found around the house!
