

All about the Voiceless /TH/ sound

- The /th/ sound is made by placing your tongue between your upper and lower front teeth with the mouth slightly open. Voice is off
- Some children can say the /th/ at the end of words before they can say the /th/ at the beginning of words.

Some common errors for the /TH/ sound

- Some children use a /t/ or /f/ for /th/ (“bat” for “bath”)or (“baf” for “bath”)

Awareness activities to develop a child’s recognition of the /TH/ sound in everyday conversations

- Emphasize the /th/ sound in your speech
Example: Parent: “Brush your teeth”. Listen, teethh has a ‘th’ sound. “teethh.”
For older children, provide the sound’s name too: “Teeth ends with /th/”.
- Emphasize /th/ words within your child’s speech
Example: Child: “I have bof books.”
Parent: “Both? You have both books. Thanks for grabbing both books.”

Cue child’s production of /TH/ using corrective feedback strategies in everyday conversations

Child says: “toof” (for tooth)

Adult responds with a strategy that best fits the moment:

- Provide a good Model of the /TH/ by saying the word again slowly and clearly:* “Toothh.”
- Provide a Visual Cue:* Point to your tongue and emphasize the /TH/ sound as you say “Toothh.”
- Provide a Verbal Cue:* “Listen to the /TH/ sound. Toothh. I use my tongue to make the /th/.”
- Provide Feedback:* “I heard the /ffff/ sound when you said three.”
- Use a Communication Breakdown technique:* “A toof?”

Target Sound Practice designed to give children many opportunities to say the /TH/ correctly

Learning speech sounds takes practice. The speech/language pathologist will assign one targeted speech sound for the child to work on each week. Find a quiet, consistent time each day to practice with the child.

Activity One: Awareness Activities for /TH/ before Target Sound Practice

- Use the Listening List (below) to heighten awareness of the /TH/ before target sound practice sessions.

Activity Two: Target Sound Practice for /TH/ with words and picture cards

- Use the Target Sound Picture Cards (next page) and activities to give the child many opportunities to practice saying the /TH/ sound correctly in words. Provide the child with feedback on how he/she is doing as they practice (e.g. “Great Job!”, “That was close, say it again after me.”)

Cueing strategies to get correct production of /TH/ during Target Sound Practice

Child says: “mouf” (for mouth)

- Say, “Let’s try that again. Mouthh”
- Point to your mouth. Say “Watch me, mouttth”
- Put your fingers on your mouth to give a visual cue and say “Mouthh.”

Listening List /TH/

Say these words to your child. Have them watch and listen without repeating you.

broth	moth	cloth	north
growth	truth	both	south
Smith	sloth	booth	Beth

Carrying over Target Sound Practice to other Times of the Day

Cut apart the cards below. Put these cards in different places in your home, in the childcare and/or school. This allows the child practice throughout the day and instills the importance of using good speech skills all the time, not just at practice time. It also helps transfer correct productions into other environments, with other people, and in other word contexts. Examples of places to put these cards are:

on the bathroom countertop
at his/her place at the dinner table
on the car booster seat

on his cubbie at daycare/preschool
on the doorway leaving the classroom
on his/her pillow to say before bed

Ask me to say these words: bath tooth mouth path	Ask me to say these words: bath tooth mouth path

SOUND PROBE – TH at the End of Words

Please complete this after you have finished the entire home program with your child. You will complete a different sound probe for each set of target words you were given. This will give the speech/language pathologist an idea of how well the target sounds transferred to words that were not practiced by your child.

Instructions:

- Say these words as naturally as possible to your child
- Have your child repeat these words after you
- Listen only for the target sounds that were practiced
- Check the appropriate box next to each word

	Correct	Incorrect
EARTH <u>TH</u>	<input type="checkbox"/>	<input type="checkbox"/>
