

Hello 5<sup>th</sup> grade families!

We continue to miss you all and wish that we were teaching face to face! We are learning a ton about technology though!

For this week of April 14-17, 2020, here are your learning tasks:

- Reading – Water, Water Everywhere, sheet, read and answer questions. Open this document in Notability and send it back with your responses. You could also send Mrs. Moua an email, typing your responses in a word document, or right within the email you send her.
- Math – You will continue to receive Math puzzles/challenges that review essential learning that you have already practiced with Mrs. Lawrence.
- Writing – We want you to continue working on your persuasive essay following the directions in the packet you were given. These should be done this week. Send us what you have, even if it is only 1 paragraph.

Continue to work hard, and we look forward to seeing your learning!

Mrs. Moua and Mrs. Lawrence
