

Dear Sam Davey Parents/Guardians,

The beginning of the school year is an excellent opportunity to reinforce positive behaviors and routines. Your child will have an active role in defining many of the rules and expectations for his/her classroom which can also be carried out in the home. This helps your child define what is expected and avoid any confusion that may lead to your child having problems succeeding in a particular area or setting. We have provided an example matrix and a blank matrix to be completed at home. Your child's classroom teacher will get them started. Please work together to complete the matrix in order to meet the needs of your family! We hope this will help make the school year positive and successful!
